

## Total Japanese PSA Tape Production 2012

PSA tape production volume in Japan was 1014.18 million square meters in 2012. In this last decade, production volume has been limiting the range of 1000~1200 million square meters but it was the fewest in the past 10 years. On the other hand, the sales value was 1212.94 million USD (1USD=100Yen) in 2012. This value was the fourth fewest in this period.

Above production data is not the total of all Japanese PSA tape companies but the total of 18 JATMA membership manufactures. We guess it covers 70% of all Japanese companies.
